- Indonesia

ABOUT ME

Proficient in software development with expertise in multiple programming languages and frameworks. Skilled in assuming leadership positions within project teams, adeptly managing both front-end and back-end aspects to ensure project success

PROJECTS

EO PRIME

EO Prime: Web-based platform for buying/selling event tickets. Users browse events, select tickets securely. Organizers manage events, track sales, and access analytics for improvement. Streamlines ticketing process for attendees and organizers.

TEFAREN

Tefaren is a web-based platform for borrowing TEFA items from SMK Telkom Banjarbaru. Users can browse items, submit loan requests, and manage borrowed items online, making the process efficient and user-friendly while helping the school maintain a comprehensive inventory.

TELTIX

Teltix is a mobile app for purchasing tickets to watch films created by Telkom students. Users can browse student films, choose showtimes, and securely buy tickets from their mobile devices, supporting new talent and enjoying unique cinematic experiences.
